16.06 Assignment Instructions

Instructions: Work through Activity 8 and 9 of the Picture Lab found in this lesson. The files needed and details for completing each item below can be found in the lesson.

After all activities are completed, the following will be completed:

1. Copy previous files related to the Picture Lab to a new project folder.
2. For Activity 8 Exercises, create the following methods and their tester methods:
    - A second `copy` method that copies just part of an image.
    - The `myCollage` method that uses at least three images and one mirroring effect.
3. After the Activity 8 Exercises are complete, update the worksheet with your results.
4. For Activity 9 Exercises, create the `edgeDetection2` method and its tester method.
5. After the Activity 9 Exercises are complete, update the worksheet with your results.
